6. Recommendations & Watch Items

1. **Reduce concentration:** Top 3 holdings at 80.1% — consider rebalancing into mid-cap L1s and DeFi protocols
2. **Sector rotation:** Evaluate L2 allocation — 0.0% current exposure; scaling networks historically outperform in bull markets
3. **Stablecoin strategy:** Current allocation sufficient
4. **Rebalancing trigger:** Any single holding exceeding 50% portfolio weight warrants immediate review
5. **Next review:** End of Q2 2026 or upon material market structure change (ETF approval, regulatory event, 30%+ drawdown)
